

Welcome to use lightning

Now you can download any files with simple steps, let's get start:

1. input a link to open a web-page
2. tap any hrefs you want to download
3. a task will be created if the href you taped can be download.

Here is some demo links, tap on them will start download, have a try:

- [download a zip](#)
- [download an image](#)
- [download an pdf](#)
